

Apply for an unregistered vehicle permit

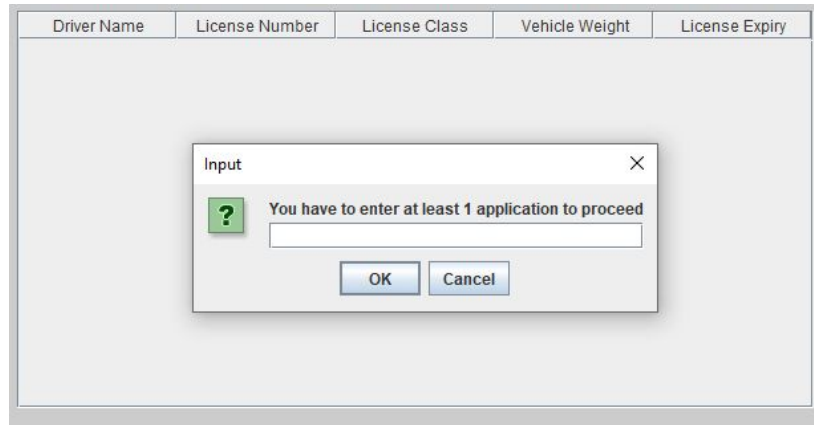

USER GUIDE

Java application created to speed up the process of applying for temporary registration when moving interstate or changing vehicles.

The user runs the program and is greeted with a question of how many applications they would like processed. The user is expected to select a value from 1 to infinite. If no/null values are used anywhere the user will be prompted to re-enter.

The screenshot shows a Java application window titled "Apply for an unregistered vehicle permit". The window has a grey background and a title bar with standard window controls. At the top, it displays the NSW Government logo and the text "Transport Roads & Maritime Services". Below this, the title "Apply for an unregistered vehicle permit" is centered in a large, bold, black font. In the center of the window, there is a table with five columns: "Driver Name", "License Number", "License Class", "Vehicle Weight", and "License Expiry". Below the table, there is a text input field. Above this input field, there is a small dialog box titled "Input" with a green question mark icon. The dialog box contains the text "Please enter the number of applications you would like to apply for today:" and a text input field. Below the input field in the dialog are "OK" and "Cancel" buttons. Below the main text input field in the application window, there is a line of text: "Please enter these values using a comma between each entry. First Name, License Number, License Class, Vehicle Weight, License Expiry". Below this is an example: "Example: Paul, 652431, C, 1.3, 2025". At the bottom of the window, there are three buttons: "Edit", "Remove", and "Add".

If the user simply hits enter, clicks ok or writes a negative or 0 value it will prompt them to type a valid input.

Once the user inputs a correct value they can then click the Add button to start adding the number of applications they requested

After selecting add they are shown the current application number being processed and the total number they chose. The user can then add their first entry into the text field. As long as the user inputs a comma between each value they can use any amount of spaces.

First Name,License Number,License Class,Vehicle Weight,License Expiry
Example: Paul, 652431, C, 1.3, 2025

Paul , 78231456, C, 1.8,2025

Edit Remove

Add

Driver Name	License Number	License Class	Vehicle Weight	License Expiry
Paul	78231456	C	1.8	2025
Peter	771524	R	2.2	2020
John	2416883	C	2.0	2030

The user can hit enter each time they have finished inputting a new application and enter again to open the next entry.

Driver Name	License Number	License Class	Vehicle Weight	License Expiry
Paul	78231456	C	1.8	2025
Peter	771524	R	2.2	2020
John	2416883	C	2.0	2030

Warning

 You have reached your selcted number of records = 3

OK

Once they have input all of their initially chosen values it will say they have reached their maximum number of entries.

It then gives the user a yes or no option to add more applications.

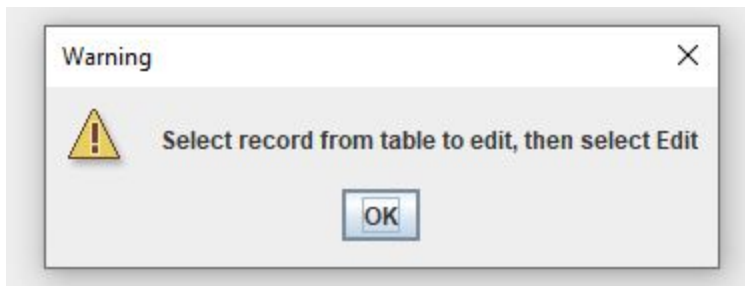

The user enters no and no more records will be entered, is they enter yes they will be asked again how many records they want to enter.

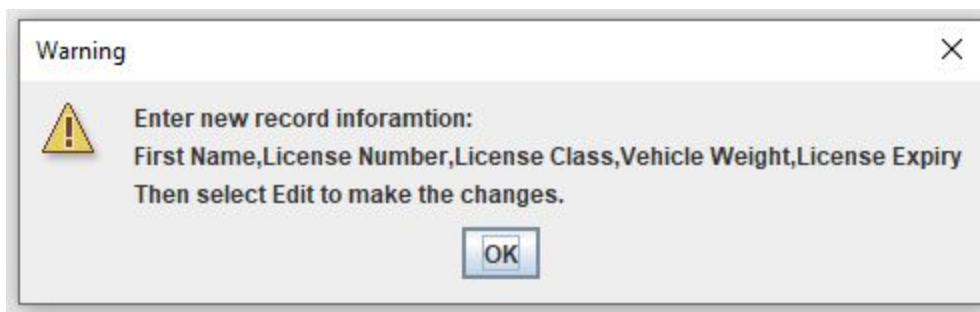

The user can then add the new entry to the table.

Driver Name	License Number	License Class	Vehicle Weight	License Expiry
Paul	78231456	C	1.8	2025
Peter	771524	R	2.2	2020
John	2416883	C	2.0	2030
Sarah	1253422	C	1.1	2022

If the user wants to edit a value in the table they click the Edit button and see this.

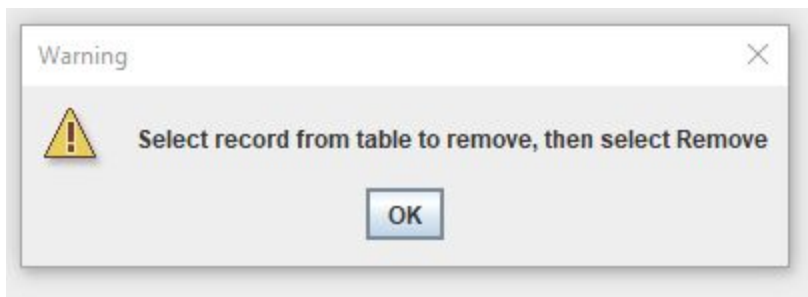

Prompts the user to select an entry and click edit again.

Once selected they are shown this. And can then edit the values.

Driver Name	License Number	License Class	Vehicle Weight	License Expiry
Paul	78231456	C	1.8	2025
Peter	771524	R	2.2	2020
John	2416883	C	2.0	2030
Sarah	99999	R	0.15	2020

If the user selects the Remove button they are shown this.

When they select a record and click remove again the entry is taken off the table.

Driver Name	License Number	License Class	Vehicle Weight	License Expiry
Paul	0		0.0	0
Peter	0		0.0	0
John	0		0.0	0
